

ANSIBLE INTEGRATION WITH JENKINS

Launch 2 servers (Ansible and slave)

Install ansible and jenkins in ansible server

And make a ssh connection btwn ansible and slave through root user

Go to jenkins and install plugin called publish over ssh

Go to manage jenkins>configure system> ssh publish> add

Name : ansible_server

Hostname : ansible server private ip

Username : root

Click on advance : and add a root user password

[Test connection]

Create a free style job

Add build step —>**Send files or execute commands over SSH** ---->

exec command : ansible-playbook filename.yml
